ONSITE STORES

Given the remote location of the onshore industry we have customisable onsite stores available to mobilise critical tooling, consumables and equipment for purchase or hire, on consignment or on hire – off hire basis as required.

The benefits Onsite Stores provide are,

- Streamlined supply chain management
- Reduced procurement and logistics costs
- Instant access to critical tools and components
- Improved operational productivity
- Confidence in the quality of products and services

This approach includes regular site visits by a dedicated Winnellie Hydraulics account manager to ensure stocks are up to date, monthly invoicing is managed and any improvements are implemented upon clients request.

Winnellie Hydraulics are recognised in the industry as technical supply specialists with a comprehensive understanding regarding the theoretical and practical aspects of everything we sell and hire. For this reason we do not offer safety equipment, stationary or other items stocked by distribution warehouses, however will always look to accommodate requirements as needed on a case by case basis.

Onsite stores are available in 10, 20 and 40ft options.

For more information please contact us.

REMOTE AREA & 'HOTSHOT' DELIVERIES

Sometimes, that one missing component or important piece of equipment can cause long production delays which equates to lost revenue. This is something Winnellie Hydraulics are mindful of, that's why we are here to help!

Winnellie Hydraulics specialises in providing urgent support in remote areas across northern and central Australia. We currently servicing all remote areas including the McArthur River, Tennant Creek, Mount Isa, East Arnhem Land and Tanami regions.

We pride ourselves on our ability to continually react quickly to customer requirements. We have the ability to provide same day product, service and delivery solutions from Darwin to your site, minimising down time to our valued clients.

All 'hot shot' deliveries will be carried out in accordance with our travel management plan ensuring fatigue and road safety is closely managed.

ONSITE SUPPORT

Winnellie Hydraulics is a solutions focussed provider, delivering supply, service, calibration and hire services in the Northern Territory for over 35 years. Our business is comprised of a team of industry specialists delivering multi discipline solutions including, supplying critical components (hydraulic, pneumatic, gas, motion) under call off and contract models.

Our service capability includes:

- Complete hydraulic and pneumatic component and system repairs, servicing and maintenance
- Industrial and hydraulic hose supply and re-certification
- Calibration of hydraulic and pneumatic torque wrenches
- Mobilisation of specialist technicians to onshore and offshore facilities to assist with scheduled and unscheduled shutdown / maintenance campaigns
- Engineering support for complex systems across a range of low, medium and high-pressure applications.

Skills and qualifications our technicians possess include:

- Trade Certificate
- Flange Management 1 & 2
- Confined Space Entry & Confined Space Rescue
